

# We Promise Our Submersible Water Pumps Will Be Quiet.

The control of other household noise is over to you.

GREAT  
HOUSEHOLD  
WATER PRESSURE

**Don't let a noisy water pump spoil the peace and quiet of your home. That's what families are for!**

Watersmart offer a range of submersible pumps which provide whisper-quiet operation at all times of the day or night.

Unlike conventional models, these pumps can be installed inside your water tank. The fully automated control system is built into the pump housing, allowing the pump to sense when water is required and automatically respond.

**Features include:**

- Extremely quiet, automatic operation
- Easy to install (and overall installed cost saving)
- European design and manufacture
- Stainless steel body, components and motor
- Built in pump control system - no external controls required
- Built in run dry protection
- Automatic self test every 72 hours
- Installation inside or outside the water tank
- Very power efficient
